

Executive Summary: Bike Sales Dashboard in Excel

The **Bike Sales Dashboard** is an interactive and data-driven visualization tool designed in **Microsoft Excel** to analyze key sales trends and customer demographics in the bicycle industry. This dashboard provides insights into various factors influencing bike purchases, such as **gender, income, age group, commute distance, education, occupation, region, and marital status**.

Key Features:

- **Income Analysis by Gender:** Displays the average income levels of customers segmented by gender and purchase status.
- **Age Bracket Analysis:** Illustrates the relationship between age groups and the likelihood of purchasing a bike.
- **Commute Distance Impact:** Analyzes how the distance traveled by customers influences their purchasing decisions.
- **Demographic Filters:** Interactive slicers for **education level, occupation, marital status, and region** to dynamically analyze different customer segments.

Insights & Benefits:

- Helps identify target demographics for marketing campaigns.
- Assists in understanding customer purchasing behavior and patterns.
- Provides data-driven decision-making for sales and marketing strategies.

This dashboard is a powerful tool for businesses looking to **optimize their sales strategy** and gain a **data-driven understanding** of customer behavior.
