

Executive Summary

Ferns and Petals Sales Analysis Dashboard

Project Overview

This project presents a comprehensive sales analysis dashboard for Ferns and Petals, providing valuable insights into revenue, customer spending, product performance, and order trends. The dashboard is designed to facilitate data-driven decision-making by visualizing key sales metrics using **Power Query, Power Pivot, Pivot Tables, and Data Visualization Techniques** in Excel.

Objectives

The primary objectives of this analysis include:

- Understanding **total revenue and customer spending patterns**
- Identifying **top-performing products and categories**
- Analyzing **sales trends by occasions, months, and order timing**
- Evaluating **geographical sales distribution**

Key Findings

1. Total Revenue and Customer Insights

- The total revenue generated is **₹35,20,984**, with an average customer spending of **₹3,520.98**.
- A total of **1,000 orders** were placed, with an average delivery time of **6 days**.

2. Revenue Trends

- **Revenue by Occasions:** Key events like **Raksha Bandhan, Valentine's Day, and Anniversaries** contribute significantly to sales.
- **Revenue by Month:** Peak sales occur in **March and June**, while some months show a decline.
- **Revenue by Hour:** Order volume fluctuates throughout the day, peaking during specific hours.

3. Product Performance

- **Top-performing product categories** include **Colors, Plants, and Soft Toys**, with **Colors** generating the highest revenue of **₹10,05,645**.
- **Top-selling products** include **Magman Set, Harum Pack, and Quia Gift**, contributing significantly to revenue.

4. Geographical Insights

- Major cities contributing to sales include **Dhanbad, Guwahati, and Indore**.

- The distribution of orders suggests high engagement from multiple urban regions.

Technical Implementation

- **Power Query & Power Editor** were used to clean, transform, and structure raw data.
- **Pivot Tables & Measures** enabled dynamic aggregation of sales figures.
- **Data Visualizations & Charts** provided an intuitive representation of trends, making insights accessible.

Conclusion

This sales analysis dashboard equips stakeholders with actionable insights to optimize sales, enhance customer experience, and drive business growth. The integration of **data processing, analysis, and visualization techniques** makes it a powerful tool for strategic planning.
